Francisco Meirino "Anthems for unsuccessful winners"

"Anthems for unsuccessful winners" continues the work started on my previous release "Connections, opportunities for mistakes". The music is based on the idea that there is beauty in failure, on recording what is not supposed to be : gear failures, death of a PA system, electro-static noise. "Anthems...." adds attempts at using the limits of compression and equalisation to reach the end of what is audible on digital support.

Assembled and recorded at Shiver Mobile in Lausanne, Switzerland and New York, Usa by F. Meirino 2009-2010.

Francisco Meirino first began recording in 1994, using until 2009 the moniker Phrog. His music is a complex and constantly changing electronic soundscape, ranging from ultra dynamic electro-acoustics to sheer noise passages.

His music is widely published with work released through :

Groundfault Recordings / Entr'acte / Echomusic / Banned Productions / Even Stille / Solpism / Gameboy / Carbon / Obscurica / Truculent Recordings and his own imprint : Shiver Sounds.
